About

John Martirano

proprietor of Revision42

Skillz

I am an Information Scientist by degree with a wealth of experience in software development. I bring more than technical skills to any project in which I am involved, I bring life skills: a focus on process and design, enthusiasm for collaboration and meeting deadlines, and a unique perspective and insight. I have the ability to make novel conceptual connections across domains that serves my projects well in a fast changing environment. I have a strong sense of OOP as well as data model and database design. And I bring that logical design sense to many other areas of life.

Explore some snippets in my selected project posts.

Technical Capabilities

Software and Web Application Development: Ruby on Rails, Javascript, jQuery, YUI, Apache Tomcat, Java(since its inception), C(10yrs), C++(5yrs), Unix networking, Linux, Win32, multi-threaded design, OpenGL, XML, python, project management,
